

SECTION V

REVENUE CODES

Effective - July 1, 2004

**Prepared by:
Department of Revenue
State Budget Office**

Revenue Structure

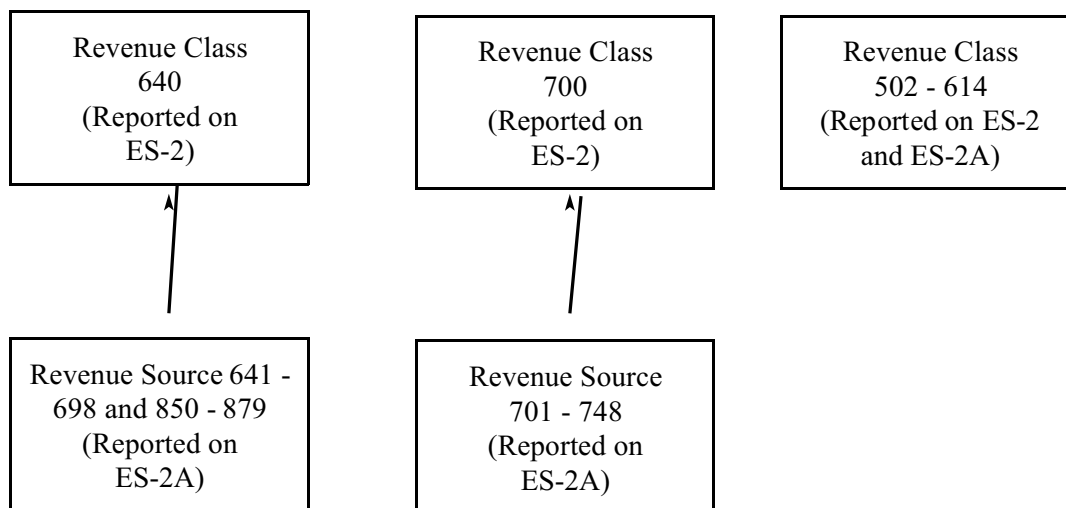

The revenue structure in WVFIMS is distinguished by two categories: revenue classes and revenue sources. **Revenue Class** identifies the overall type of revenue (General, Federal and Special), and the **Revenue Source** identifies the specific type of revenue (sales, registration fees, etc.). At the state level, the class is considered the “parent,” and specific revenue sources (children) roll up to the class (see Figure 1).

Revenue Class 640 designates revenue derived from special revenue collections, and specific sources (641 - 698 and 850 - 879) roll up to this class. **Revenue Class 700** designates revenue collected from the federal government, and specific sources (701 - 748) roll up to this class.

Revenue Classes 502 - 595 are primarily used to designate revenues derived from various taxes and collections that make up the General Fund of the State. Unlike revenue classes 640 and 700, these class numbers (502 - 595) do not have specific revenue sources that roll up to the parent class; therefore, the revenue class and revenue source are the same. Although this section of revenue classes is designated for General Revenue collections, these classes can be used to account for revenues collected in an agency’s federal or special revenue accounts. For example, an agency authorized to invest special revenue funds will derive revenue from interest earned on investments. Although this is a special revenue account, interest revenue is recorded using revenue class 523.

Revenue Classes 600 - 614 are used to designate revenues that make up the State Road Fund, and are used primarily by the Department of Transportation.
